Introduction

All users requesting services of the Open Science Grid must abide by a common set of basic rules. This document lists those basic rules. Details of processes enforcing these rules are documented separately.

Users Agreement

(1) You may only perform work and store data where those organizations of which you are a member are authorized to use resources and consistent with the objectives of the organizations.

(2) You will not attempt to circumvent controls on authorized use of resources and if you are informed that some aspect of your grid usage is creating a problem, you will immediately alter your usage to resolve the complaint. You will immediately report any suspected compromise of your grid credentials (security@opensciencegrid.org) or suspected misuse of grid resources (abuse@opensciencegrid.org).

(3) Resource providers have the right to restrict access as they deem necessary both for defense and to ensure continued availability to authorized users. Restrictions may include temporary or permanent removal of an individual's access.
